COMMIT - 10/13/2026

Backend: PDF Processing & API Routes

- Integrated Tesseract OCR to extract text from scanned PDFs.
- Added PDF text extraction using `pypdf` and PyMuPDF.
- Implemented `POST /upload/` for PDF uploads with UUID-based filenames.
- Implemented `POST /analysis/` to process uploaded documents and generate analysis IDs.
- Implemented `GET /analysis/{analysis_id}` to retrieve analysis results.
- Added `GET /health/` for backend health checks.
- Tested all endpoints successfully using Swagger UI.
